PROFESSIONAL SUMMARY

Enthusiastic and detail-oriented Full Stack Developer with 2 years of experience in building web applications using Python, Flask, AngularJS, and PostgreSQL. Skilled in REST API development, SQL optimization, and building scalable solutions. Hands-on experience with GitHub and Postman. Familiar with basic AI/ML concepts and actively learning modern AI technologies. Passionate about problem-solving, learning new technologies and delivering high-quality software.

TECHNICAL SKILLS

Languages	Python SQL HTML/CSS
AI/ML	LLMs Langchain GenAI NLP Machine Learning Deep Learning
Database	PostgreSQL, MySQL, Firebase, SQL Alchemy ORM
Tools	FastAPI Django Flask Docker GitHub Postman VSCode PyCharm JWT
APIs	REST APIs, API Integration and API Design

WORK EXPERIENCE

Application Developer March 2024 – February 2026
Sri Sivasubramaniya Nadar College of Engineering (HCL Corporation) – Chennai

Core Projects – Academic ERP

- Developed and maintained Flask-based REST APIs for internal applications and portals.
- Designed and optimized PostgreSQL queries, functions, indexes to improve performance.
- Built and enhanced AngularJS frontend components integrated with Flask APIs for smooth user experience.
- Used Swagger for API documentation and Postman for endpoint testing and validation.
- Participated in code reviews, debugging and performance tuning to ensure high-quality deliverables.

Special Assignments – Preadmission student tracking system

- Built a mobile app for admission teams to track student presence, test completion, and interview status in real time.
- Integrated secure Firebase authentication and Fire store live updates, with 90%+ unit test coverage for reliability.

SELF-INITIATED PROJECT

Task Manager Application | Tech: Flask | PostgreSQL | Redis | Docker | Nginx

- Built a containerized full-stack task manager with REST APIs and PostgreSQL integration.
- Improved performance using Redis caching and reduced database load.
- Deployed using Docker Compose with Nginx reverse proxy for single URL access.

AI Emotion Chat App | Tech: Angular, TypeScript, WebSocket, ML Sentiment Analysis

- Created a real-time chat app that detects user emotions and responds intelligently with emoji-based feedback, using a polished modern UI with avatars, typing animation and chat bubbles.

EDUCATION

Anna University
B.E Mechanical Engineering
GPA: 8.2

Aug 2019 - 2023
